

SynapOne

SynapOne Solutions Inc. (dba SynapOne) is an 8(a) innovative solution development and consulting company committed to delivering cost-effective and reliable information management solutions for the largest government agencies and Fortune 500 commercial clients by combining an innovation culture with CMMI mature processes.

- **Discipline** in project management, requirements gathering, prototyping
- **Knowledge** of best-in-class technologies and systems engineering
- **Talent** for effective strategy, solutions design, and problem-solving

Advanced Analytics Solutions

SynapOne's information management and data analytics solutions deliver tangible results. Our goal is to provide our clients with a holistic approach to source, integrate, enrich, and share vital information across their enterprise. Our proprietary Advanced Analytics frameworks lead to faster speed, greater consistency, and greater quality from Day One of a project.

Core Capabilities:

- Advanced Analytics & Data Sciences
- Data Discovery & Management
- Business Intelligence
- Building an Analytics Function
- IOT & Big Data

Agile Transformation Solutions

We blend Extreme Programming (XP), Scrum, and Lean practices to foster high-quality, quick-return development. Our iterative, sprint-based approach enables our dev team to begin delivering production-ready software in a just few weeks. Our development environments are built out using the following key practices:

- Scrum framework for project management
- Continuous integration with prominent build monitors
- Kanban-style sprint boards that make work and progress visible
- Utilization of a variety of Agile management tools, such as Rally and VersionOne, to support distributed teams and stakeholders
- Evolutionary architecture and iterative design

| Network & Infrastructure Operations | Network & Infrastructure Engineering | Network & Infrastructure Cybersecurity |
|--|--|---|
| <p>Operations support concentrates on day-to-day activities</p> <ul style="list-style-type: none">• Monitor and Improve• Incident Management• Configuration/Change Management• Asset and Inventory Management• Equipment Maintenance | <p>Engineering support focuses on changes to the network and infrastructure</p> <ul style="list-style-type: none">• Architect & design network /wireless network infrastructure• Install (setup, configure, & test) network/wireless network infrastructure• Test & troubleshoot E2E network solutions and servers• Provide virtual infrastructure support• Plan and execute data center consolidation• Plan and execute move to a cloud/hosted environment | <p>Cybersecurity support is devoted to guaranteeing the network and infrastructure is protected around the clock from both external and internal threats</p> <ul style="list-style-type: none">• Certification & Accreditation• Security Assessment and Authorization (A&A) compliance• Security Operations Center (SOC)• Enterprise Security Management (ESM)• Risk analysis and assessment• Cyber Kill Chain Methodology• Security as a Service (SECaaS)• Identity and Vulnerability management• Continuity of Operations (COOP)/Disaster Recovery (DR) |

SynapOne

Innovative Cloud Solutions

Empowering enterprises in their continuous transformation journey by providing full stack cloud services. We help drive cost savings, flexibility, security and compliance for mission critical applications. We will help you choose the best cloud technologies and map out a strategy for your business that virtualize processes, accelerate time-to-market and increase profitability, improve the customer experience, and increase workforce collaboration.

Core Capabilities:

- Application Migration to the Cloud
- Public, Private and Hybrid Cloud Management Services
- COTS Software Deployment to the Cloud
- High-Performance Computing

Digital Transformation Solutions

SynapOne's Digital Transformation practice is a leader in providing next generation technology to global enterprises. We combine our core business knowledge with leading technologies such as digital, robotics process automation, cognitive technologies and analytics to offer powerful business intelligence that helps in improving business visibility, allowing business leaders to respond quickly to evolving market needs. We use machine learning (ML) tools and algorithms to help companies develop AI-driven products and solutions.

Core Capabilities:

- Task & Process Automation with Attended & Unattended Bots
- Data Management – Input and Output Transmission
- Center of Excellence for Enterprise Automation Management

eDiscovery Solutions

SynapOne provides a wide range of Electronic Discovery (eDiscovery) and Digital Forensics services to our federal and commercial clients. We help our customers with thorough analysis of digital evidence and investigative services creating a comprehensive and defensible process helping clients to respond to investigation quickly and efficiently. We are experts in the following areas:

- End to end eDiscovery Reference Model (EDRM)
- Records Management
- Data preservation, collection, analysis, and authentication
- Data Loss Protection and Prevention
